HIGH-CAPACITY Powered Wire Winder Kit

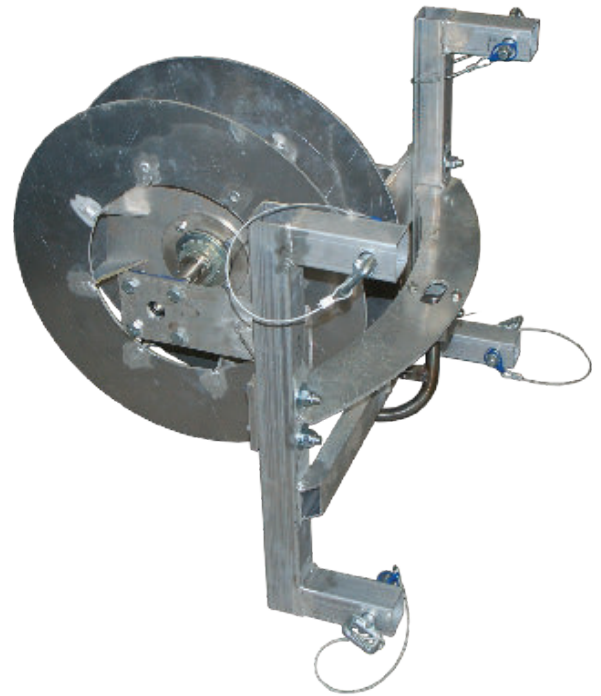

This new Powered Wire Winder will accommodate up to 650 feet of wire rope, making taller drops possible.

The High-Capacity Powered Wire Winder utilizes **single power / control cables** and features **3-phase auto-detect**. This wire winder mounts easily with pin connectors on connecting frames at the end of standard SSU (Sky Stage Ultra) platforms.

Compatible with any Sky Climber LNX or Compact-series personnel hoists, these wire winders are available in single-line or dual-line configurations.

Packages include two powered wire winder assemblies, junction boxes, and a central control box.

- Compatible with any Sky Climber Compact or LNX model hoists
- Available for single-line or dual-line applications
- Control cables are sold separately and are available in varying lengths.

SINGLE-line Kit (PN 4279-1)

Component	Part No.	Quantity
