

8ft End Beam With Decals

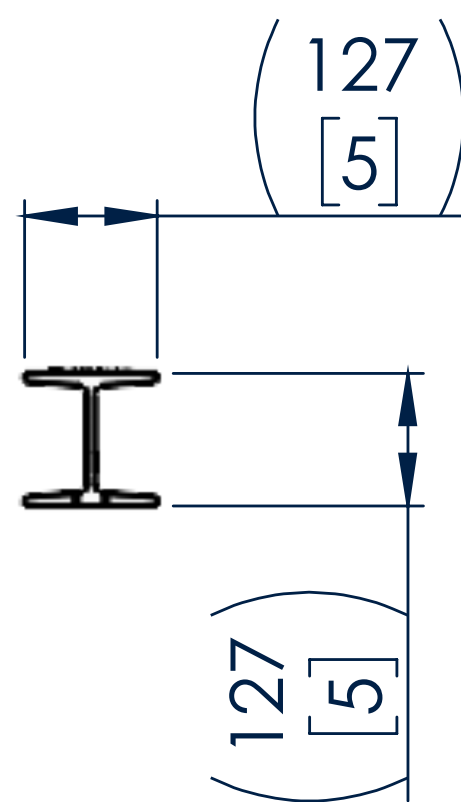

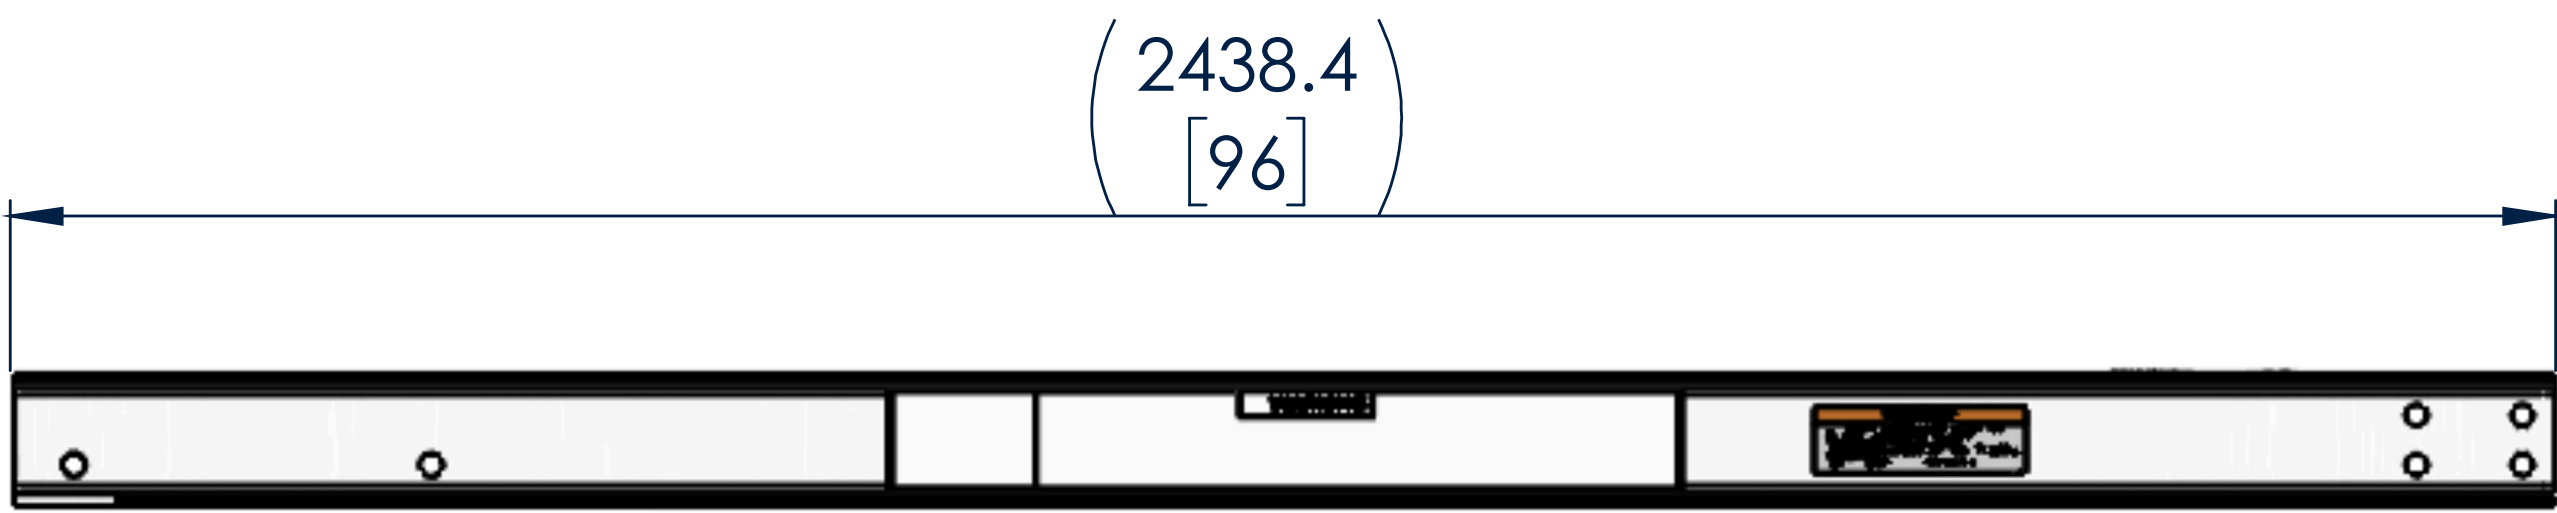

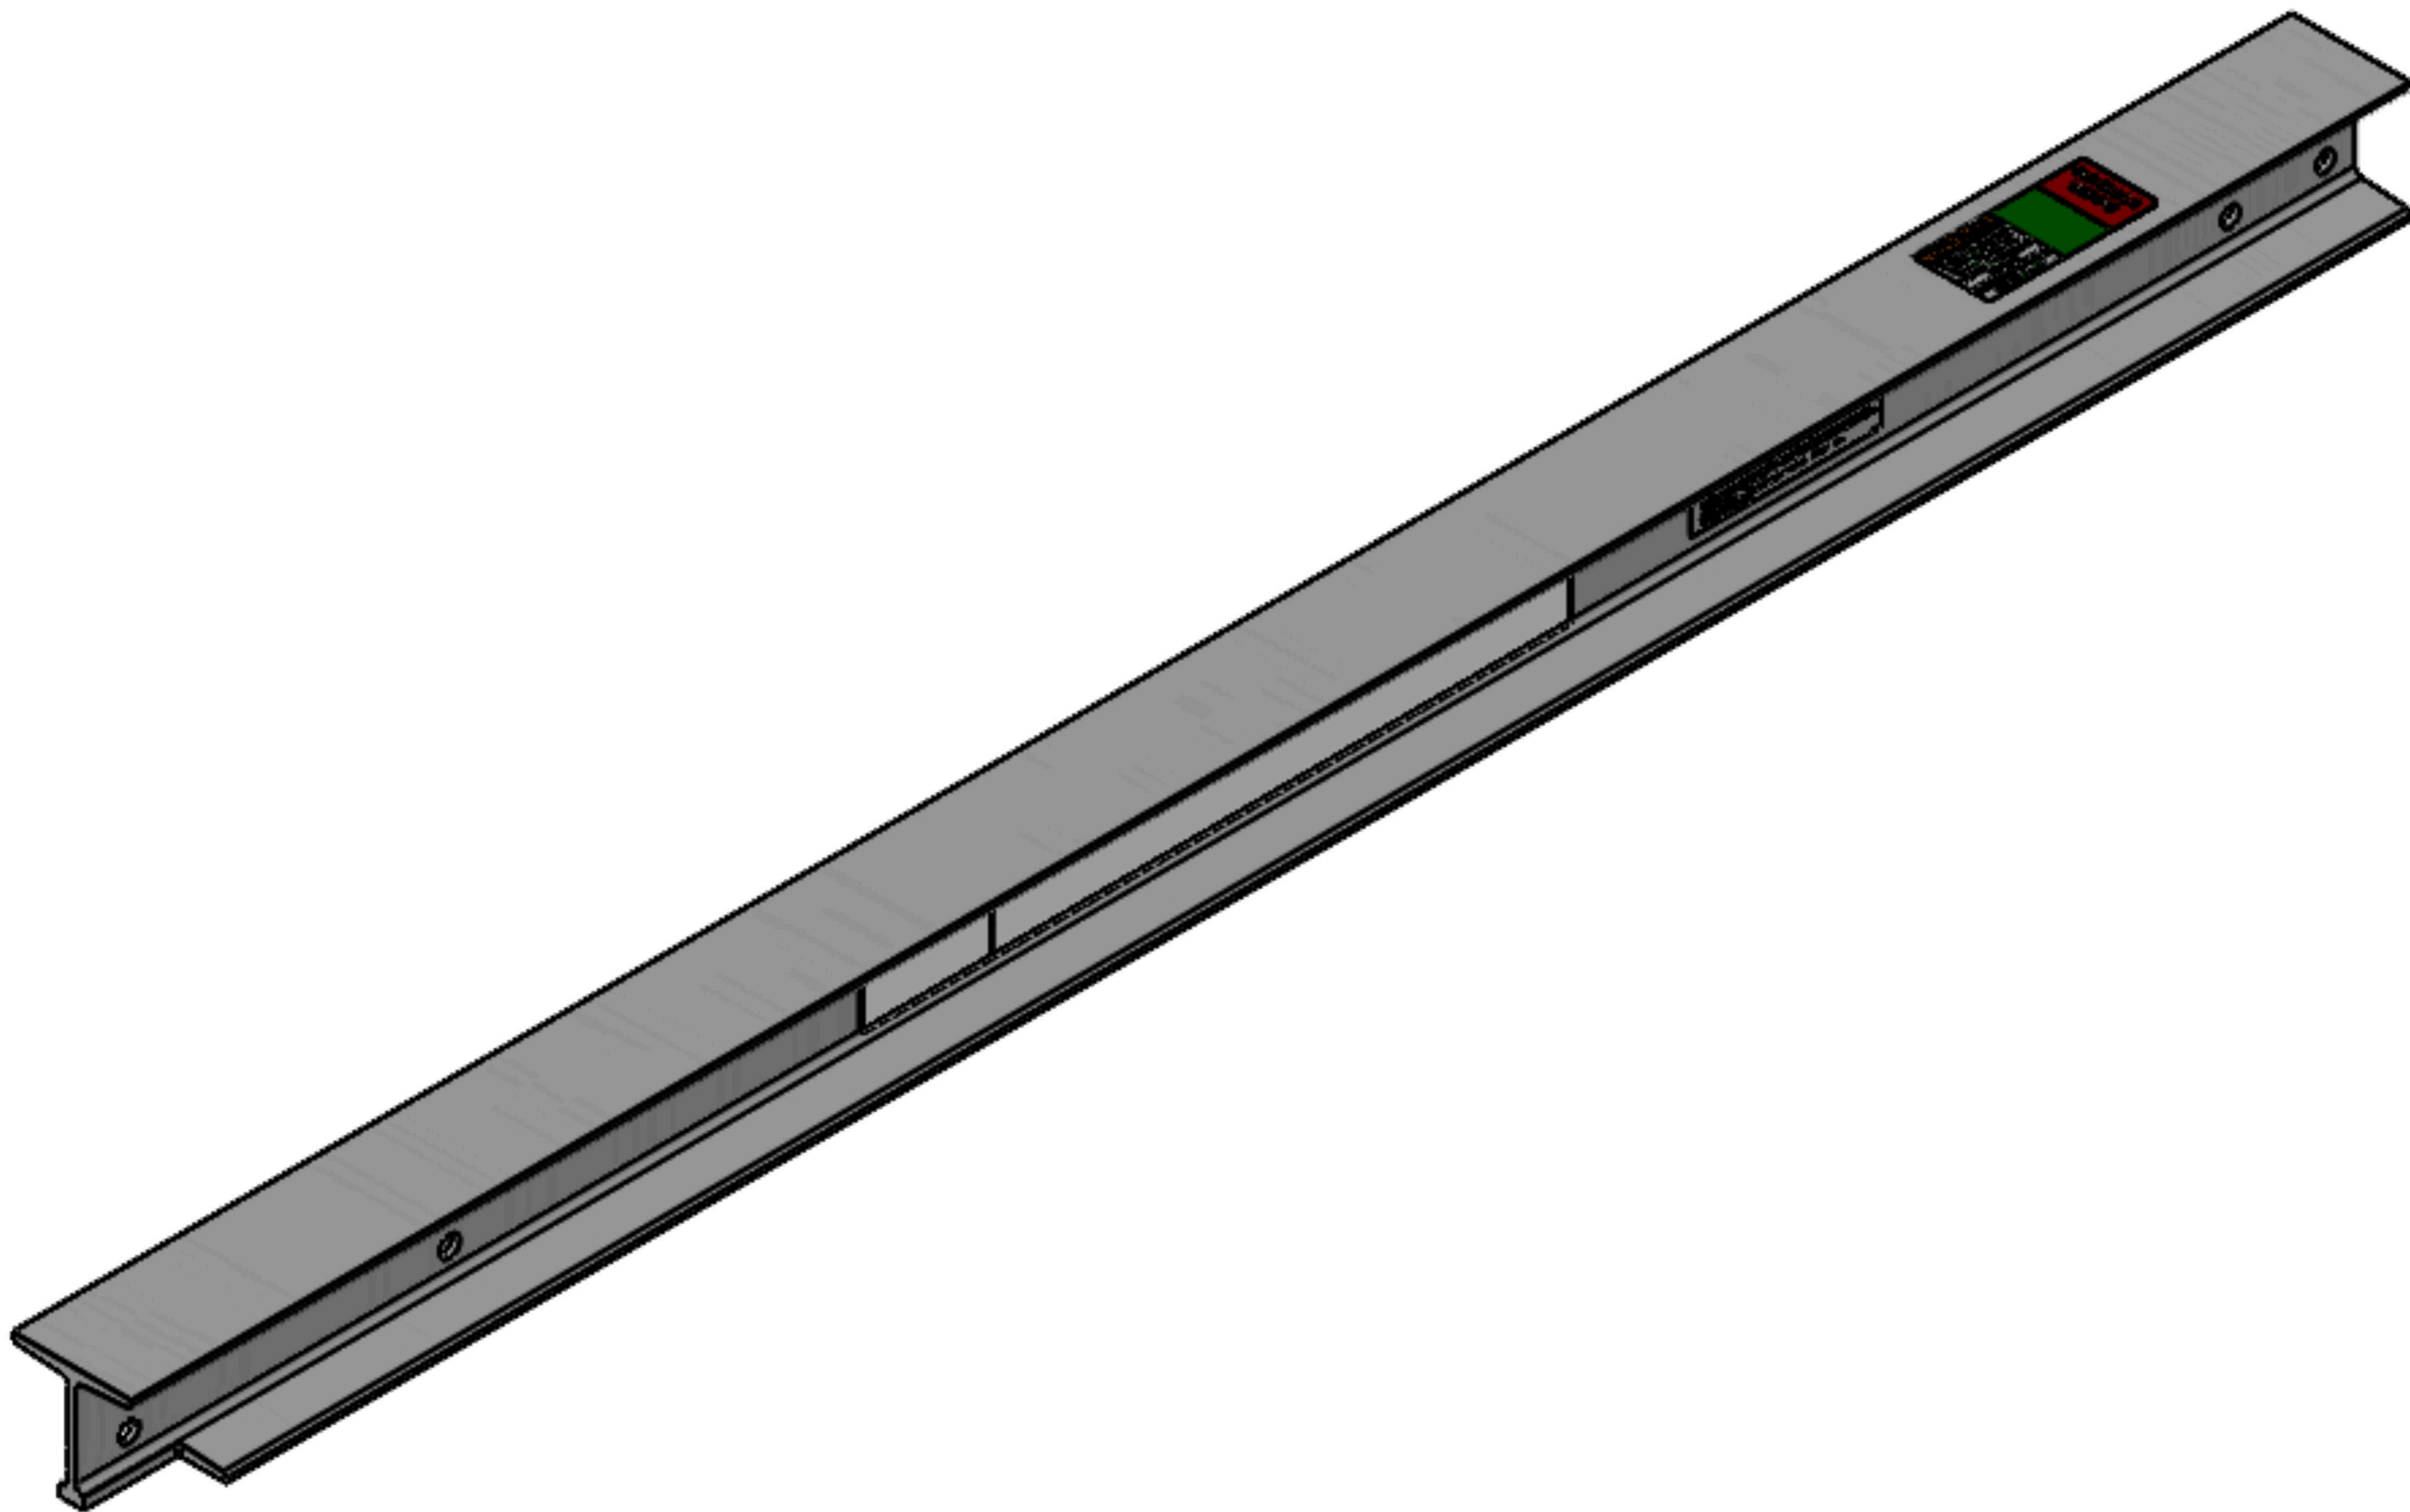

155-21-DATASHEET

Description

- End Beam is the terminal section of an outrigger system, providing connection points and proper geometry for safe suspension. Built for strength and alignment, it completes modular rooftop rigging assemblies.

Information

- Terminal beam section with connection interfaces.
- Maintains geometry for safe suspension.
- Heavy-duty construction for job site conditions.
- Integrates with Sky Climber beam packages.
